Report no. DSD-2023-275, dated May 27, 2023, as prepared for the June 6, 2023 Heritage Kitchener meeting, outlines the 2023 Mike and Pat Wagner Award nomination summaries for 5 nominated properties.

This addendum report is to add the nomination summary for 1 Queen Street North to report no. DSD-2023-275.

1 Queen Street North (American Hotel) – Rehabilitation / Adaptive Reuse of Cultural Heritage Resources

The subject property is listed as a non-designated property of cultural heritage value or interest on the Municipal Heritage Register. The original owner of the property is Louis Breithaupt, who served as Mayor of Berlin from 1879 to 1880. The site was home to the American Hotel and remains the oldest commercial building in Kitchener. The property has undergone rehabilitation and continues to be used as commercial space. The rehabilitation work included improvements to the structural integrity of the building, repairs to the masonry, and updates to the egress. Additions to modernize the building such as an elevator and washroom were included. The exterior was finished with various elements appropriate to the style of the building, including trim, decorative moulding, and cornices.

Hello,

Please note the following response to Great Places Awards - 2023 has been submitted at Wednesday April 26th 2023 11:46 AM with reference number 2023-04-26-063.

- **Nomination type**
  Mike & Pat Wagner heritage award

- **Mike & Pat Wagner heritage award**
  Rehabilitation / adaptive reuse of cultural heritage resources

- **Has this project been nominated before?**
  No

- **Name of project being nominated**
  American Hotel

- **Project address/location**
  1 Queen Street North

- **Why are you nominating this project?**
  It has been through too many tenants, too much abuse, and what was left too little, to make a reasonable candidate for a more precious restoration. Yet, what is said to be the oldest building in downtown Kitchener circa 1862, still deserved to be rescued, repurposed and revitalised in a lasting way.

  American Hotel
  1 Queen Street North, Kitchener
  Building Height: 3 Storeys
  Building Area: 621 sqm
  GFA: 1839 sqm

  It began with stripping away layers of haphazard renovations, inside and out. Sagging joists were sistered, beams and columns were added. Openings were braced and structural loads transferred. Brick was repaired and refinished.

  Then, to prolong the use of the building and extend its life indefinitely, an elevator and washrooms were added, and means of egress updated to comply with current building codes. Conflict upon compromise was discovered and necessary, budgets blown and timelines tested - less determined owners would have thrown in the towel.

  But at long last, the building is whole and the street level exterior has now been reunified. Generous expanses of glazing and a continuous signage band serve new commercial tenants and office spaces above. The building is finished with trims, decorative moulding and cornices of the appropriate style, and in a discrete and dignified black. Save for one wall, which is instead clad in a contemporary pattern of shiny metal, in order to enhance the historically nondescript side facing Goudie's Lane.

OBC SUMMARY

3.1.17. Occupant Load
A2 = 1.10/m^2 (dining, alcholic beverage and cafeteria space)
E = 3.7/m^2 (basements and first storey)

3.3.1.1 Separation of Suites
45 min required between suites and floors, floor ratings provided by sprinkler system as per T.11.4.3.4.A.

3.4.2.5. Location of Exits
1(c) 45m (147'-7") for occupancies other than high hazard industrial, if sprinklered.

3.4.3.2 Exit Width
SUITE B:
EXIT ROUTE A: D101 = 965mm/6.1=159PPL
EXIT ROUTE B: EXISTING DOOR = 864mm/6.1=142PPL
NEW STAIRS = 1130mm/8.0=142PPL

SUITE C:
EXIT ROUTE A: D101 = 965mm/6.1=159PPL
EXIT ROUTE B: EXISTING DOOR = 864mm/6.1=142PPL
NEW STAIRS = 1130mm/8.0=142PPL (TO BE CONFIRMED)

3.7.4.3. Washroom Requirements
3.7.4.2(1) Occupant load for offices for plumbing fixture count = 14 m^2/person
3.7.4.7(2) Shared washroom for less than 10 persons.
3.7.4.8(2) Public washrooms for mercantile = 1/300 males and 1/150 females except that (a) wc for employees can count toward public count if accessible to the public, (b) if the total mercantile area is less than 600 m2, only 1 wc/sex be provided.
*Less than 18 employees and 600m^2 = 1 wc/sex, publicly accessible
NOTE: Retail space on the ground floor may be initially occupied by the same office tenant as the second floor. Washrooms for the second floor office use will be provided on the second floor. Retail washrooms at the ground floor will be by tenant. The tenant will apply for a change of occupancy permit.
Retail: Assuming a maximum of 18 retail employees (9/sex) only 1 washroom per sex is required. Public retail washrooms can be shared with employee washroom if accessible for less than 600m^2 (retail= 517m^2). Therefor only two unisex, including one barrier-free, washrooms are required.
Office: Based on an occupancy load of 14m^2/person 2 fixtures/sex are required for Phase 1 and a total of 3/sex for Phase 2.
3.7.4.2.(7) The water closet and lavatory provided in the universal washroom described in Sentences 3.8.3.12.(1) may be counted as part of the plumbing fixtures required for males and females.

3.8.3.13
A barrier-free shower is not required where there is only one in a group.

11.2.1.1 A Construction Index
The building currently has no visibly fire ratings between floors. It is assumed that the fire protection performance level on the Construction Index (CI) is 4.

11.4.3.4A
There is not a reduction in the performance of the building according to 11.4.2 and therefore the additional upgrades required in table 11.4.3.4A are not applicable. However, as previous demolition may have altered any rating on the existing floor assemblies, upgrades are required within the area of scope to bring CI to match the HI of the new occupancy. A 45 minute FRR is required between floors or sprinklers at area without the required rating.
*All areas within the scope of work are proposed to be sprinklers.
