

AMENDMENT NO. XX TO THE OFFICIAL PLAN
OF THE CITY OF KITCHENER

CITY OF KITCHENER

1668 King Street East

AMENDMENT NO. XX TO THE OFFICIAL PLAN
OF THE CITY OF KITCHENER

CITY OF KITCHENER
1668 King Street East

INDEX

SECTION 1	TITLE AND COMPONENTS
SECTION 2	PURPOSE OF THE AMENDMENT
SECTION 3	BASIS OF THE AMENDMENT
SECTION 4	THE AMENDMENT

APPENDICES

APPENDIX 1	Notice of the Meeting of Planning & Strategic Initiatives Committee of September 12, 2022
APPENDIX 2	Minutes of the Meeting of Planning & Strategic Initiatives Committee
APPENDIX 3	Minutes of the Meeting of City Council

SECTION 1 – TITLE AND COMPONENTS

This amendment shall be referred to as Amendment No. XX to the Official Plan of the City of Kitchener (1994). This amendment is comprised of Sections 1 to 4 inclusive.

SECTION 2 – PURPOSE OF THE AMENDMENT

The purpose of the Official Plan Amendment is to amend:

- Map 10 – Secondary Plan - King Street East Neighbourhood Plan For Land Use by redesignating lands, municipally addressed as 1668 King Street East from 'Mixed Use Corridor' with Special Policy 1' to 'Mixed Use Corridor' with Special Policy 7"
- Adding Policy 13.2.3.7 to Section 13.2.3 to permit a maximum floor space ratio of 7.2:
 - Specific Policy 13.2.3.7 amends one policy in the Mixed Use Corridor use designation:
 - Policy 13.2.2.7 is amended to permit a maximum floor space ratio of 7.2.

SECTION 3 – BASIS OF THE AMENDMENT

Planning Analysis:

Planning Act, R.S.O. 1990, c. P.13 25.

Section 2 of the Planning Act establishes matters of provincial interest and states that the Minister, the council of a municipality, a local board, a planning board and the Tribunal, in carrying out their responsibilities under this Act, shall have regard to, among other matters, matters of provincial interest such as,

- f) The adequate provision and efficient use of communication, transportation, sewage and water services and waste management systems;
- g) The minimization of waste;
- h) The orderly development of safe and healthy communities;
- j) The adequate provision of a full range of housing, including affordable housing;
- k) The adequate provision of employment opportunities;
- p) The appropriate location of growth and development;
- q) The promotion of development that is designed to be sustainable, to support public transit and to be oriented to pedestrians;
- r) The promotion of built form that,
 - (i) Is well-designed,
 - (ii) Encourages a sense of place, and
 - (iii) Provides for public spaces that are of high quality, safe, accessible, attractive and vibrant;
- s) The mitigation of greenhouse gas emissions and adaptation to a changing climate.

These matters of provincial interest are addressed and are implemented through the Provincial Policy Statement, 2020, as it directs how and where development is to occur. The City's Official Plan is the most important vehicle for the implementation of the Provincial Policy Statement, 2020 and to ensure Provincial policy is adhered to.

Provincial Policy Statement, 2020:

The Provincial Policy Statement (PPS) provides policy direction on matters of provincial interest related to land use planning and development. Section 1.4.3(b) of the PPS promotes all types of residential intensification, and sets out a policy framework for sustainable, healthy, liveable and safe communities. The PPS promotes efficient development and land use patterns, as well as accommodating an appropriate mix of affordable and market-based residential dwelling types with other land uses, while supporting the environment, public health and safety. Provincial policies promote the integration of land use planning, growth management, transit-supportive development, intensification, and infrastructure planning to achieve cost-effective development patterns, optimization of transit investments, and standards to minimize land consumption and servicing costs.

To support provincial policies relating to the optimization of infrastructure, transit and active transportation, the proposed designation and zoning facilitate a compact form of development which efficiently uses the lands, is in close proximity to transit options including bus, rapid transit, and makes efficient use of both existing roads and active transportation networks. The lands are serviced and are in proximity to parks, trails and other community uses. Provincial policies are in support of providing a broad range of housing. The proposed multiple dwelling development represents an attainable form of market-based housing.

Planning staff is of the opinion that the proposed application will facilitate the intensification of the subject property with a mixed-use multiple dwelling development that is compatible with the surrounding community, helps manage growth, is transit supportive and will make use of the existing infrastructure. No new public roads would be required for the proposed development and Engineering staff have confirmed there is capacity in the sanitary sewer to permit intensification on the subject lands.

Based on the foregoing, staff is of the opinion that this proposal is in conformity with the PPS.

A Place to Grow: Growth Plan for the Greater Golden Horseshoe, 2020 (Growth Plan):

The Growth Plan supports the development of complete and compact communities that are designed to support healthy and active living, make efficient use of land and infrastructure, provide for a range and mix of housing types, jobs, and services, at densities and in locations which support transit viability and active transportation. The subject lands are in close proximity to transit and parks.

Policy 2.2.6.1(a) states that municipalities will support housing choice through the achievement of the minimum intensification and density targets in this plan by identifying a diverse range and mix of housing options and densities, including additional residential units and affordable housing to meet projected needs of current and future residents.

Policies 2.2.1.4 states that complete communities will:

- a) feature a diverse mix of land uses, including residential and employment uses, and convenient access to local stores, services, and public service facilities;
- b) improve social equity and overall quality of life, including human health, for people of all ages, abilities, and incomes;
- c) provide a diverse range and mix of housing options, including additional residential units and affordable housing, to accommodate people at all stages of life, and to accommodate the needs of all household sizes and incomes;
- d) expand convenient access to:
 - i. a range of transportation options, including options for the safe, comfortable and convenient use of active transportation;

- ii. public service facilities, co-located and integrated in community hubs;
- iii. an appropriate supply of safe, publicly-accessible open spaces, parks, trails, and other recreational facilities; and
- iv. healthy, local, and affordable food options, including through urban agriculture;
- e) provide for a more compact built form and a vibrant public realm, including public open spaces;
- f) mitigate and adapt to the impacts of a changing climate, improve resilience and reduce greenhouse gas emissions, and contribute to environmental sustainability; and
- g) integrate green infrastructure and appropriate low impact development.

The Growth Plan supports planning for a range and mix of housing options and, in particular, higher density housing options that can accommodate a range of household sizes in locations that can provide access to transit and other amenities.

The subject lands are located within the City's delineated built up area, and within an Urban Corridor in the 2014 Kitchener Official Plan. Urban Corridors are identified as a Primary Intensification Area in the City of Kitchener's Official Plan on Map-2. The proposed designation and zoning will support a higher density housing option that will help make efficient use of existing infrastructure, parks, roads, trails and transit. The proposed development is also proposing to include several unit types, increasing the variety of housing options for future residents. Planning staff is of the opinion that the applications conform to the Growth Plan.

Regional Official Plan (ROP):

Urban Area policies of the ROP identify that the focus of the Region's future growth will be within the Urban Area. The subject lands are designated Built-Up Area in the ROP. The proposed development conforms to Policy 2.D.1 of the ROP as this neighbourhood provides for the physical infrastructure and community infrastructure to support the proposed residential development, including transportation networks, municipal drinking-water supply and wastewater systems, and a broad range of social and public health services. Regional policies require Area Municipalities to plan for a range of housing in terms of form, tenure, density and affordability to satisfy the various physical, social, economic and personal support needs of current and future residents.

The Region of Waterloo have indicated they have no objections to the proposed application (Appendix 'D'). Planning staff are of the opinion that the applications conform to the Regional Official Plan.

City of Kitchener Official Plan (OP)

The City of Kitchener OP provides the long-term land use vision for Kitchener. The vision is further articulated and implemented through the guiding principles, goals, objectives, and policies which are set out in the Plan. The Vision and Goals of the OP strive to build an innovative, vibrant, attractive, safe, complete and healthy community.

The subject lands are designated 'Mixed Use Corridor with Special Policy Area 1' (Map 10) in the King Street East Secondary Plan (1994 Official Plan). The Mixed Use Corridor land use designation provides residential redevelopment opportunities together with appropriate commercial and institutional uses that primarily serve adjacent residential neighbourhoods. Over time it is intended that the Mixed Use Corridors shall intensify and provide a balanced distribution

of commercial, multiple residential and institutional uses. The policies of Special Policy Area 1 were deleted through OPA 111.

The applicant is proposing to add Special Policy Area 7 to the King Street East Secondary Plan to allow a Floor Space Ratio (FSR) of 7.2 whereas the current Official Plan policies allow for a maximum FSR of 4.0 with an additional 1.0 FSR permitted if a 1000 square metre or larger food store is located within the mixed-use development. The proposed increase to the Floor Space Ratio (FSR) is also required to support the proposed built form, which includes above grade structured parking internal to the building. Due to the significant grade change on site, underground site contamination and a high water table only one level of below-grade parking structure is feasible. As such, 3 levels of above grade parking internal to the building with one level of above grade deck parking are proposed. The parking structure is proposed to be wrapped with dwelling units along King Street East and Weber Street East and therefore screened from view although still contributing to FSR. The parking structure by itself represents an FSR of about 1.6. The amount of floor space occupied by the multiple dwelling units and commercial space represents an FSR of about 5.6, which is only slightly above the allowable FSR. City policies support the construction of structured parking in order to maximize intensification opportunities and minimize surface parking. Staff is of the opinion that the proposed increase to the FSR is appropriate.

Urban Structure

The Official Plan establishes an Urban Structure for the City of Kitchener and provides policies for directing growth and development within this structure. Intensification Areas are targeted throughout the Built-up Area in key locations to accommodate and receive the majority of development or redevelopment for a variety of land uses. Primary Intensification Areas include the Urban Growth Centre, Major Transit Station Areas, Nodes and Corridors, in this hierarchy, according to Section 3.C.2.3 of the Official Plan. The subject lands are located within an 'Urban Corridor' in the 2014 Kitchener Official Plan. Urban Corridors are identified as a Primary Intensification Area in the City of Kitchener's Official Plan on Map-2.

Urban Corridors are generally linear in form and are located along existing or planned transit corridors. They are intended to have strong pedestrian linkages and be integrated with neighbouring residential and employment uses. The subject lands have direct access to two regional transit corridors which have multiple bus routes, access to Highway 8 and Highway 7.

According policy 3.C.2.38 of the Official Plan, the planned function of Urban Corridors is to provide for a range of retail and commercial uses and intensification opportunities that should be transit-supportive. Urban Corridors function as the spine of a community as well as a destination for surrounding neighbourhoods. Strengthening linkages and establishing compatible interfaces between the Urban Corridors and surrounding Community Areas and Industrial Employment areas are priorities for development in these areas. The proposed development is planned for mixed-use which provides 184.4 square metres of retail/commercial along the King Street East frontage and provides for 616 purpose-built rental units.

Staff is of the opinion that the proposed development will help to increase density in an area well served by nearby transit while being context sensitive to surrounding lands and provides excellent access to off-road pedestrian and cycling facilities.

Staff is of the opinion that the proposed Official Plan Amendment and Zoning By-law Amendment will support a development that not only complies with the City's policies for an Urban Corridor but also contributes to the vision for a sustainable and more environmentally-friendly city.

Neighbourhood Planning Review (NPR)

1668 King Street East is within the King East Neighbourhood Planning Review (NPR) area. A statutory public meeting was held on December 9, 2019 regarding draft amendments to the King Street Secondary plan. The proposed Official Plan designation for the site is 'Mixed Use' and the proposed zoning is 'Medium to High Rise Mixed Use Three Zone (MIX-3)'. The NPR project is under review and updated draft land use designations and zoning will be considered in 2023.

Urban Design

The City's urban design policies are outlined in Section 11 of the City's OP. In the opinion of staff, the proposed development meets the intent of these policies, specifically: Streetscape; Safety; Universal Design; Site Design; Building Design, and Massing and Scale Design. To address these policies, an Urban Design Brief and Design Report was submitted and has been reviewed by City staff. The Urban Design Brief outlines the vision and principles guiding the site design and informs the proposed zoning by-law regulations.

Streetscape – The King Street East frontage is activated by at-grade commercial units, with 184.4 square metres of commercial space proposed along the King Street East frontage. Furthermore, both buildings' principal entrances and lobbies are located at grade with direct access to public sidewalks. Both towers include podiums that have defined bases which will enhance the streetscape.

Safety – As part of the site plan approval process, staff will ensure Crime Prevention Through Environmental Design (CPTED) principles are achieved and that the site meets the Ontario Building Code and the City's Emergency Services Policy.

Universal Design – The development will be designed to comply with Accessibility for Ontarians with Disabilities Act and the Ontario Building Code.

Skyline – The proposed towers will provide a new feature on the City's skyline. The proposed buildings will create visual interest from several different vantage points.

Site Design, Building Design, Massing and Scale – The subject site is designed to have a development that will be developed at a scale that is compatible with the existing and planned built form for the surrounding neighbourhood. The two towers have well defined podiums and building step backs which helps enhance the public realm. Massing is broken up at the 8th and 12th storeys on both towers which mitigate overlook issues and shadow impacts.

Tower Design

The proposed building tower A (building located along King Street East) is classified as a "Compact Slab" as the proposed tower floor plate is less than 850 square metres in area. The tower placement has been oriented towards King Street with an 8 storey podium and building step backs at the 12th floor. The tower massing is broken up vertically by variation and the articulation of building materials. Furthermore, balconies for the residential units are included on the street-facing elevations.

The proposed building tower B (building located along Weber Street East) is classified as a "Compact Point". Building B has well defined 8 storey podium along Weber Street which increases to 12 floors and then 23 floors. Like building A, the massing of building B is broken up

vertically by variation and the articulation of building materials. Furthermore, balconies for the residential units are included on the street-facing elevations.

Shadow Impact Study

The owner has completed a Shadow Impact Study in addition to the Urban Design Report. Staff have reviewed the study and are satisfied the shadow study meets the City's requirements, with respect to shadow impacts, as noted in the City of Kitchener Urban Design Manual.

Wind Study

A wind study was prepared for the consideration of this development proposal and reviewed by staff. The wind conditions surrounding the proposed development are generally suitable. The submitted Preliminary Wind Study indicates less than ideal wind conditions for the on-site amenity area. Wind control features will be required through the site plan application staff as will a full Wind Assessment be required and reviewed at the site plan application stage.

Tall Building Guidelines

The proposed development has also been reviewed for compliance with the City's Design for Tall Buildings Guidelines. The objective of this document is to:

- achieve a positive relationship between high-rise buildings and their existing and planned context;
- create a built environment that respects and enhances the city's open space system, pedestrian and cyclist amenities and streetscapes;
- create human-scaled pedestrian-friendly streets, and attractive public spaces that contribute to livable, safe and healthy communities;
- promote tall buildings that contribute to the view of the skyline and enhance orientation, wayfinding and the image of the city;
- promote development that responds to the physical environment, microclimate and the natural environment including four season design and sustainability; and,
- promote tall building design excellence to help create visually and functionally pleasing buildings of architectural significance.

The proposed development concept has been reviewed with these objectives in mind. City staff has confirmed that the proposed towers are generally consistent with and meet the overall intent of the City's Design for Tall Building Guidelines. More specifically, the proposed development meets the onsite and offsite separation distance requirements of the Design for Tall Building Guidelines.

Transportation Policies:

The Official Plan supports an integrated transportation system which incorporates active transportation, allows for the movement of people and goods and promotes a vibrant, healthy community using land use designations and urban design initiatives that make a wide range of transportation choices viable. The subject lands are located along King Street and Weber Street both which have multiple bus routes (GRT Routes 7 and 8) and stops located within walking distance. The building has excellent access to cycling networks, including existing on and off-street cycling facilities. The location of the subject lands, in the context of the City's integrated transportation system, supports the proposal for transit-oriented development on the subject lands.

The proposed Official Plan Amendment and Zoning By-law Amendment applications will support a more intensive mixed-use residential development in a location that is supported by the transportation network. The location of the proposed buildings, secured through the proposed site-specific provisions, will result in a built form that fosters walkability within a pedestrian-friendly environment that allows walking to be safe, comfortable, barrier-free and a convenient form of urban travel.

At future site plan approval processes, the design of the buildings will have to feature a high-quality public realm to enhance the identity of the area and create gathering points for social interaction, community events and other activities. Additionally, secured and visitor bicycle parking will be required the Zoning By-law.

Housing Policies:

Section 4.1.1 of the City's Official Plan contains policies with the primary objective to provide for an appropriate range, variety and mix of housing types and styles, densities, tenure and affordability to satisfy the varying housing needs of our community through all stages of life. The proposed development increases the amount of multiple dwelling units available in the city. The development is contemplated to include a range of unit types including, one and two-bedroom units. These new units will meet and appeal to a variety of household needs.

Sustainable Development

Section 7.C.4.1 of the City's Official Plan ensures developments will increasingly be sustainable by encouraging, supporting and, where appropriate, requiring:

- a) compact development and efficient built form;
- b) environmentally responsible design (from community design to building design) and construction practices;
- c) the integration, protection and enhancement of natural features and landscapes into building and site design;
- d) the reduction of resource consumption associated with development; and,
- e) transit-supportive development and redevelopment and the greater use of other active modes of transportation such as cycling and walking.

Development applications are required to demonstrate that the proposal meets the sustainable development policies of the Plan and that sustainable development design standards are achieved.

Sustainable development initiatives will be further implemented at the site planning stage through the detailed design of the buildings.

Official Plan Conclusions

The Official Plan Amendment application requests that the land use designation as shown on Map 10 – King Street East Secondary Plan be changed from 'Mixed Use Corridor with Special Policy Area 1' to 'Mixed Use Corridor with Special Policy Area 7'. Based on the above-noted policies and planning analysis, staff is of the opinion that the proposed Official Plan Amendment represents good planning and recommends that the proposed Official Plan Amendment be approved.

SECTION 4 – THE AMENDMENT

The City of Kitchener Official Plan (1994) is hereby amended as follows:

- a) Amend Map No. 10 – Secondary Plan - King Street East Neighbourhood Plan For Land Use by designating the lands, municipally addressed as 1668 King Street East, as ‘Mixed Use Corridor with Special Policy 7’ instead of ‘Mixed Use Corridor with Special Policy 1’, as shown on the attached Schedule ‘A’;

NOTICE OF PUBLIC MEETING for a development in your neighbourhood 1668 King Street East

Concept Drawing

Mixed Use
Development

22 & 23
Storeys

616 Dwelling
Units

Official Plan and Zoning By-law Amendment applications will be considered to facilitate a mixed-use development with two (2) buildings, 22 and 23 storeys in height, having 616 dwelling units, 204 square metres of commercial floor area, a Floor Space Ratio (FSR) of 7.2, a reduced parking requirement and reduced rear yard building setbacks.

APPENDIX 2: Minutes of the Planning & Strategic Initiatives Committee Meeting (September 12, 2022)

APPENDIX 3 - Minutes of the Meeting of City Council (September 26, 2022)
