Dear Sir or Madam,

This is regarding the construction at 103 Peter st.
I am their neighbour at .

The only concern I have is that since they added the second and third floor, it has become much hotter in our house since the sun's rays reflect off of their house wall, and warm up our house. I need to run our in-window air conditioner for the whole day whenever the outside temperature is above 20 degrees.

Best regards,
Anastasia Denau
